History

v.1.0 2008-10-14

- First release of this module and using the ePay Standard Payment Window
- Handles: Dankort, VISA / Dankort, eDankort, VISA, Electron, MasterCard, Maestro, JCB, Diners, AMEX, EWIRE, Nordea and Danske Bank.
- As this is in its first version please contact ePay on support@epay.dk if you find any errors.

Requirements

You must have the following:

- Most recent PrestaShop based system.
- ePay Payment Gateway merchant number / login (get it here: www.epay.dk).

Before you begin

It is very important that you have an account at ePay. In order to get a 100% free demo account for testing purpose please contact ePay:

Phone: +45 98 13 90 40

Mail: support@epay.dk

Or you can signup directly on this URL:

<http://www.epay.dk/main/signup.asp>

Installation

Backup

It is always critical important to do a complete backup before new changes to the system is made. Therefore backup both the complete website and the database before making any changes!

Copy files

Copy all the files located in the catalog folder into the root of you existing PrestaShop installation. NO EXISTING FILES ARE OWERWRITTEN!. The ePay module is installed to the /modules/epay folder.

Enable the payment module

- Now enter your admin area of you PrestaShop.
- Click the "Modules" button at the top menu.
- Find the ePay module in the list of payment modules.
- Click the "install" button.
- Click the "configure" button in order to setup the module with your merchantnumber
